

Your payor contracts are worth more than you're collecting

Kubera turns every rate, rule, and fee schedule into computable contract logic so your teams identify underperforming contracts proactively and find underpayments before they become write-offs.

Common problems

Payor contracts are dense, unstructured, and disconnected from your data

Missing underpayments

Manually matching 835 remits against complex, buried contract terms means you leave thousands in unverified revenue on the table.

Weak negotiating leverage

Without clear benchmarks and contract performance data, you enter renewals armed only with spreadsheets giving payors the upper hand.

Disconnected data & teams

Revenue Cycle, Finance, and Managed Care use fragmented files, leading to billing questions and decisions based on stale data.

Our Solution

End-to-end contract & payment intelligence

Contracts

Contract Lifecycle, Extraction & Grading

Pricing terms, fee schedules, and operational clauses structured into queryable, and reportable fields. Renewal dates and expiration timelines tracked automatically, so no deadline gets missed. Benchmark terms and rates for competitiveness.

Pricing

Prospective Procedure Pricing

Price any procedure using your actual contract logic carveouts, modifiers, billing rules. Model contract rule and rate changes in the context of your real claims data.

Recovery

Payment Variance & Contract Integrity

All agents classify underpayment drivers, prioritize follow-up, and assist recovery turning revenue leakage detection from a quarterly exercise into a continuous process across your fee-for-service and value-based contracts.

Artificial Intelligence

AI Contract Assistant & Policy Monitoring

Ask plain-language questions across all your contracts, provider manuals, and policy notices and get instant answers. Surface terms, policy changes, and reimbursement nuances on demand.

Measured Outcomes

The numbers that matter to your CFO

\$1M+

Average Year 1 financial impact from contract improvements and underpayment recovery

40+

Manual hours removed per organization per week through automated workflows and a shared source of truth

10%+

Underpayment and revenue leakage detection lift for revenue integrity and payment auditing teams

90 days

From contract ingestion to live payment monitoring no heavy IT lift required
